

Why go it alone?

Budgeting and controlling costs are one of the keys to a financially healthy practice. Trying to negotiate better pricing with each of your vendors is time consuming and usually accomplishes very little. PSMA Connect combines the purchasing power of 20,000 member facilities and negotiates discounts no single office could hope for .

A typical physician practice's budget for services surpasses that for medical supplies. So when looking to decrease costs and improve profitability, looking beyond just medical supplies is critical. PSMA CONNECT has discount pricing contracts with hundreds of different non-medical supply vendors and service providers. Saving you money with a comprehensive portfolio.
